

Specifications

Software Solutions Scan to PC Professional

Key Features / Functionality	OmniPage™ Pro 15
Accuracy	
SET Tools Preprocessing	Yes
IntelliTrain Proofing	Yes
Professional Dictionaries for Legal, Medical, and Financial Terminology	Yes
Page Layout & Format Retention	
Despeckle/Deskew	Yes
True Page Output	Yes
Better Layout Retention and Document Level Page Consolidation	Yes
Maintain Header and Footer Formatting	Yes
Speed Zoning	Yes
2-Page Scanning for Recognizing Books	Yes
Exact Word Output for Improved Editability	Yes
Input File Formats	
Paper/Image File Conversion Including TIFF; BMP; JPEG	Yes
Document-2-Document conversion (Text Input)	Yes
Ability to Convert Paper and Image Forms	Yes
PDF conversion with Overlay Matching	Yes
All PDF	Yes
XIFF and TIFF.FX	Yes
Includes PDF Converter for Microsoft™ Word - Instantly turn PDF Normal files into Microsoft Word documents	Yes
PaperPort MAX	Yes
Output File Formats	
Word, Excel, Text Only HTML, TXT, Word Perfect	Yes
Microsoft WordML	Yes
Microsoft Reader .lit e-Book	Yes
Fillable HTML, XML, InfoPath, and PDF Forms	Yes
Text Searchable PDF (Image on Text PDF)	Yes
PDF Append - Attach content to existing PDF	Yes
PDF Output Digital Signatures	Yes
XML	Yes
Open e-Book	Yes
Advanced Productivity Features	
Multithreading	Yes
Google Search Indexer Included	Yes
Workflow/Batch Manager - Schedule Jobs and Workflows	Yes
Barcode Driven Workflows	Yes
Batch Manager with E-mail Notification	Yes
Recognizes Multiple Languages on Same Page	Yes
Automatic and continuous OCR	Yes
Proofing & Training	
Context Correction	Yes
Dynamic verification	Yes
Individual Character Training	Yes
Document Control	
Manual speed zoning	Yes
On-The-Fly Zoning for Easy Layout Changes	Yes
Selectable Picture Editor	Yes

Image Retriever	
Automatically delivers scanned TIF and PDF files to user's PaperPort Desktop	Yes
Automatically delivers a copy of scanned TIF and PDF files from user's email Inbox to user's PaperPort Desktop	Yes

THE DOCUMENT COMPANY FUJI XEROX

Key Features / Functionality	PaperPort™ Pro 10 PDF Converter Pro 3
Productivity	
Enhanced Visual Document Management	Yes
Split Desktop with Dual Workspaces	Yes
Application file thumbnails for MS Word, MS Excel, MS PowerPoint on the PaperPort Desktop	Yes
Application file thumbnails for image files and PDF files on the PaperPort Desktop	Yes
Adding of Keywords and Page Names to Documents on the Desktop is Enhanced	Yes
Supported links to high-end databases: DocuShare, SharePoint, FTP, ODMA, WebDav	Yes
Scanning Capture	
Scanner Enhancement Tools (SET) from PaperPort Desktop	Yes
File cleanup for all PDF files and image files - Rotate, crop, straighten, de-speckle, line enhancement, brightness adjustment, contrast and color adjustment	Yes
Annotation for all PDF files and image files - Annotate with text, highlighting, arrows and stamps	Yes
Search & OCR	
Document Management with All-in-One Search™ - Content sensitive indexing and search using Verity search engine	Yes
Name, keyword, and annotation indexing and search engine	Yes
Display Thumbnails of all Search Results	Yes
Capture text from all PDF files and image files	Yes
PDF & Document Assembly	
Create Text Searchable PDF - Platform independent	Yes
Image Over Text Searchable PDFs using OmniPage Pro	Yes
PDF Document Assembly - One-Click PDF	Yes
Stacking of Different File Types	Yes
Create Password Protected and Encrypted PDF files - Secure PDF files for sharing and archiving	Yes
PDF Password Manager	Yes
Includes PDF Create! 3 - Batch processing assistant to easily create PDFs from all PC applications	Yes
Page Stacking & Reordering for all PDF and image files	Yes
Support for PDF 1.5	Yes
Make PDF from any application using a PDF printer driver	Yes
PDF Functionality	
Includes PDF Converter Professional 3.0	Yes
Add Password, 40-bit or 128 bit encryption, to PDF Files	Yes
PDF Password Manager	Yes
Edit text and graphics of PDF files within PDF Converter	Yes
Convert PDF forms into formatted Microsoft Word documents	Yes
Digital Signatures	Yes
Add custom Headers & Footers to PDF documents (Page Numbering)	Yes
Compare changes across two PDF files	Yes
Add text notes or pop-up comments	Yes
Document Workflow	
SendTo OmniPage™ Workflow - Create automated custom workflows for auto processing	Yes
Web Capture - Tool to display web pages as visual thumbnails	Yes
Drag & Drop to email, print, etc.	Yes
Operating System Compatibility	
Network install via SMS or Active Directory	Yes
Windows	98 (SE), Me, 2000 (SP4 or higher) XP (SP1 or higher)
Fuji Xerox Multifunction Device must be scan enabled (scan to mailbox, Folder or Email).	Yes

Protecting the environment is a fundamental component of our company's commitment to corporate citizenship.

At Fuji Xerox Australia, we supply products that have been designed with both our customers and the environment in mind. As a world leader in the development of parts and components Remanufacturing Programs, we have made Eco Manufacturing an integral part of our business.

All our sites have achieved ISO 14001 Environmental Management System Certification, as a demonstration of our commitment to protecting the environment.

THE DOCUMENT COMPANY FUJI XEROX

Software Solutions Scan to PC Professional

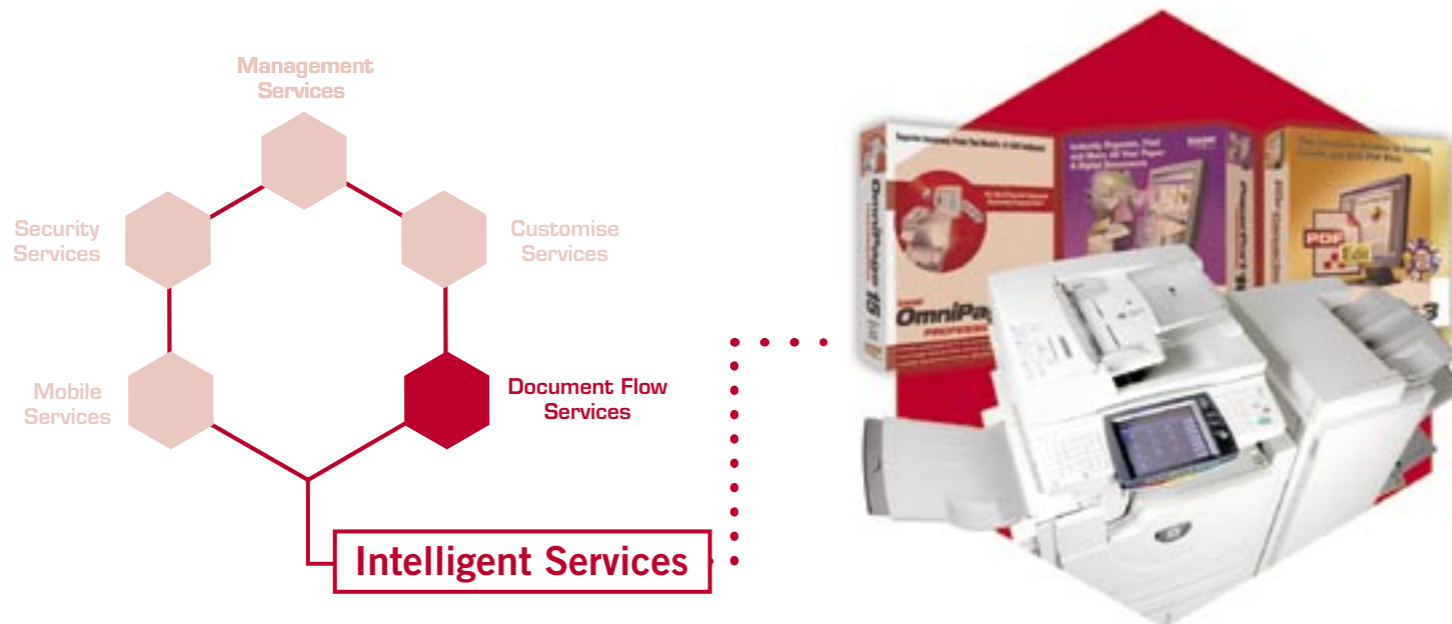

Find and share
paper and digital documents

Scan to PC your first step Professional to document integration

Fuji Xerox's commitment to meeting and exceeding customers' document-related challenges in the office has never been more evident. Working closely with our Business Partners, we custom-build solutions that leverage the power and flexibility of Fuji Xerox office technology.

Through partnerships, technology, and business process innovation, Fuji Xerox makes your work... flow. This solution designed for seamless integration with scan enabled Fuji Xerox Multifunction DocuCentre and ApeosPort devices incorporates four Nuance components: *PaperPort Professional*, *Omnipage Professional*, *PDF Converter Professional* and *Image Retriever*.

A desktop solution that satisfies your unique office workflow challenges, today and tomorrow.

Software Solutions Scan to PC Professional

PaperPort™ Professional 10

Organize, Find and Share All Your Paper and Digital Documents.

Omnipage™ Professional 15

Convert, Paper and PDF into Documents You Share and Archive.

PDF Converter Professional 3

Everything you need to convert, create and edit PDF files.

ImageRetriever™ Version 6

Automated Image Acquisition to the Desktop.

Image Retriever Benefits

The vast majority of network multifunction devices use a cumbersome "Push/Pull" methodology to transport scanned images from a multifunction device (MFD) to a local desktop. The ImageRetriever solution considerably simplifies this process by automating the image acquisition process so that each new scanned image is immediately transferred to a network folder or even an e-mail address for access through PaperPort™ by the time the user physically returns to their PC from the DocuCentre/ApeosPort.

Complete PDF Workflow

Many network scanning solutions require the support of non industry standard or proprietary file formats. For example, an MFD without PaperPort™ may scan documents in TIFF or PDF format but when the scanned image is transported to the user's desktop, it is converted into another file format. Since PDF is the native file format for PaperPort™, this problem is effectively eradicated. Users can now scan a document at the DocuCentre/ApeosPort, create a PDF image file and work with this PDF file on their desktop. Once complete, this file can be transported to another destination in its native PDF format with no file conversion, file import or file export commands required.

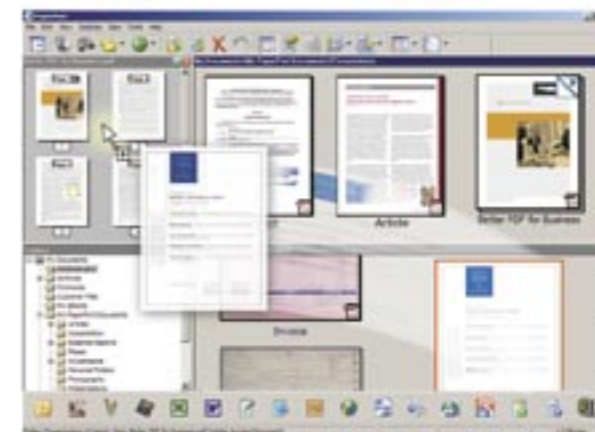

Quickly and Easily Add Information to Scanned Images

Scanned images are displayed on the PaperPort™ desktop as visual thumbnails, which can easily be annotated to add additional information such as Post It Notes, Basic Text, Highlights, Lines and Arrows and Stamps.

PDF Document Creation and Assembly

The merging of scanned documents with digital documents (for example those created using Microsoft Office applications) is an onerous multi step process.

Using the PaperPort™ desktop, documents scanned as PDF files on a DocuCentre/ApeosPort can quickly and easily be unified with PDF files created from any Windows application(s), creating one document ready for distribution or insertion into a business workflow.

Round Trip PDF Workflow Between PaperPort™ and Acrobat

Organisations that use Adobe Acrobat extensively are continuously faced with the challenge of transporting scanned image files between Acrobat and network MFD scanning applications.

Scan to PC enables round trip PDF workflows between the Fuji Xerox MFD, PaperPort™ and Acrobat. Upon scanning documents at the DocuCentre/ApeosPort as PDF image files, users can modify them at their PaperPort™ desktop by adding information (annotation), merging them and/or re-ordering pages. These PDF files can also be opened and edited in Adobe Acrobat and saved back to the user's PaperPort™ desktop.

Full Conversion and Document Repurposing

Many organisations are making the switch from traditional hardcopy storage, to digital archiving of documentation. Without scanning and Optical Character Recognition (OCR) technology, such conversion is a time consuming and labour intensive process.

By combining the capabilities of DocuCentre/ApeosPort MFDs with Scan to PC, users are able to quickly and easily convert hard copy documents to editable/searchable digital documents with accurate and complete page layout plus format retention. These documents can also be converted into a variety of file formats including, PDF, Microsoft Word, Microsoft Excel etc.

Another benefit of this solution is the option it gives users to carry out this process of conversion and archiving at their PC Conversion at a user's PC can be an automatic one-step process for routine workflow operations or a users can access a variety of tools to help in the creation of batch-process workflows that meet the organisation's requirements.

Easy Integration with Enterprise Content Management (ECM) Systems

Scan to PC serves as an intuitive scanning front-end for organisations that want to manage all their company's documents in robust enterprise content management systems such as Xerox DocuShare, Microsoft SharePoint, Oracle Collaboration Suite, Kofax Ascent Capture, and many more solutions.

Users can select a scanned image from their PaperPort™ desktop, drop it into the ECM link that appears on the PaperPort™ Send-To bar and enter descriptive information about the document into a dialog box in a format that the ECM solution will understand.

PDF Document Security

Another important challenge that you face in the office is how to secure the PDF documents that you create and work with each day. Scan to PC Desktop Professional Small Business Edition provides the answer for you. With PaperPort Professional 10, you now have a complete and encrypted PDF workflow solution. Users can set passwords on PDF files, requiring others to know the password in order to view or print the document. 40-bit and 128-bit encryption can also be applied to the PDF file, with the user able to control whether the document can be viewed, printed, edited, copied or annotated.
