

Cloud On-Demand Print

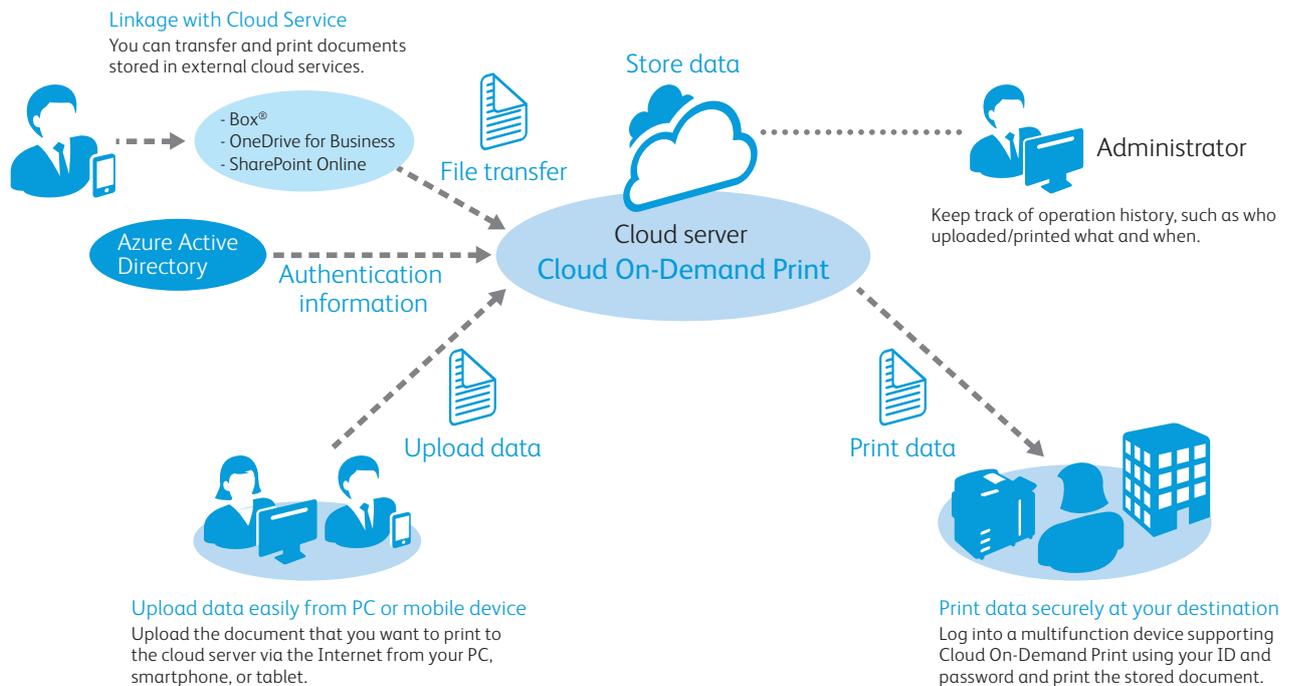

Making printing at your destination faster, easier.

Using cloud service on the Internet enables you to print on a multifunction device at your destination.

You want to print your document at your destination but there is a risk of losing data if you carry it in a USB, and constantly installing a printer driver on your PC is a nuisance. Cloud On-Demand Print can solve these problems. Store your documents from your PC or mobile device to the cloud server on the Internet and print on demand on a multifunction device at your destination using your ID and password.

You can print the necessary documents easily and securely without worrying about losing data or installing a dedicated driver.

Main Features

DOCUMENTS CAN BE UPLOADED FROM A VARIETY OF CLIENT TERMINALS

In the case of Windows PC, from a Web browser or a dedicated tool. Custom apps are available to upload documents from iOS or Android™. There is no need to install or configure a printer driver.

SUPPORT ANY BUSINESS SIZE FROM SMALL TO LARGE

Up to 3000 multifunction devices can be assigned as output device supporting Cloud On-Demand Print, flexibly supporting up to 30000 users from small group to department/business office level.

LOW IMPLEMENTATION COST, GREATLY REDUCED MAINTENANCE AND OPERATION WORKLOAD

Cloud On-Demand Print is a cloud service that can be used on a monthly subscription plan. There is no need for an in-house server or dedicated system administrator so installation and operation cost can be kept low.

LINK TO CLOUD SERVICES

You can link to external cloud services, “Box®”, “OneDrive for Business”, and “SharePoint Online”. Documents stored on these services can be transferred directly to Cloud On-Demand Print via Web UI, providing a printing environment whether you are at your office, branch office, or on the go.

LINKAGE WITH “CLOUD ID MANAGEMENT SERVICE” SIGNIFICANTLY REDUCES MANAGERS’ MAN-HOURS

If Microsoft Office 365* is used or if Azure Active Directory is established as an internal system, centralized management of users is possible. It is possible to significantly reduce managers’ man-hours for user management.

* A subscription service offered by Microsoft Corporation. A separate contract is required.

“GUEST” THAT MULTIPLE USERS CAN SHARE AND USE

With “Guest”, users who have not been registered with Cloud On-Demand Print can upload and print files by accessing the URL notified by the administrator.

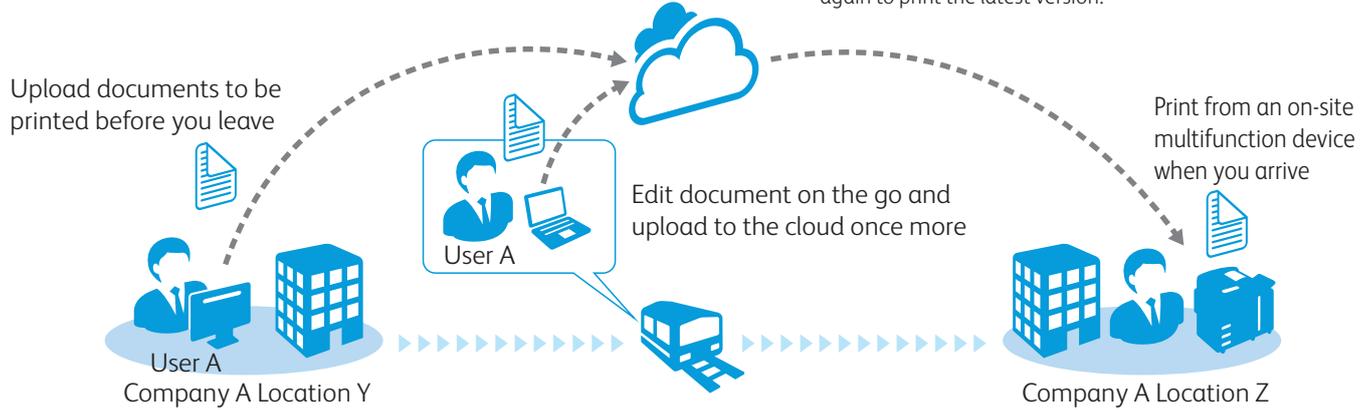

VARIETY OF SECURITY MEASURES

- Communication during document uploading/printing is SSL encrypted
- Uploaded document is deleted automatically within a specified period whether it is printed or not
- Access to the cloud server is controlled by user ID and password
- Documents can be password protected when uploading
- Operation history lets you keep track of who printed what and when

From separate in-house location Store your documents beforehand and print when you reach your destination.

- Before implementation**
- Carrying printed material is a burden.
 - Can't edit when you realize update is necessary.
 - Inconvenient to have your document printed from a USB at your destination.

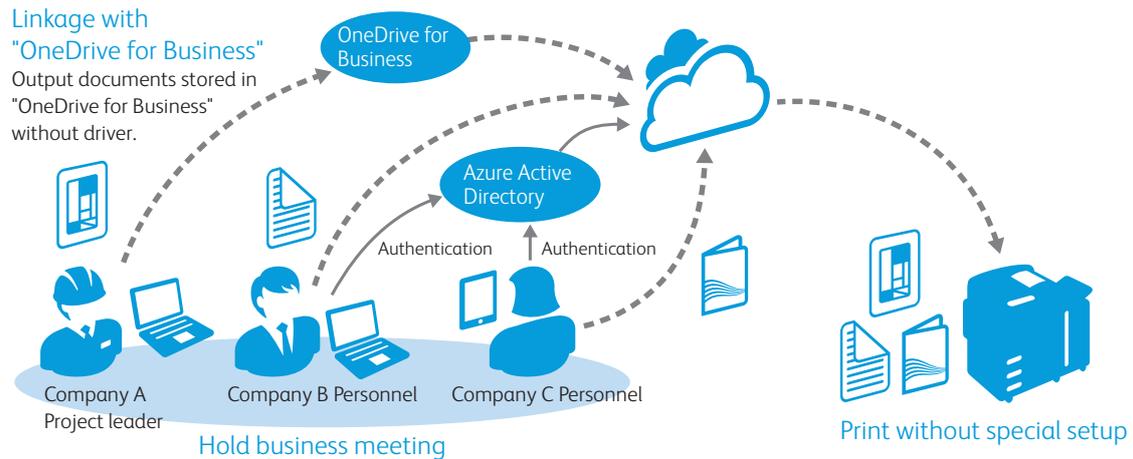

- After implementation**
- Print documents from an on-site multifunction device as soon as you arrive.
 - No need to have your document printed from a USB.
 - Large documents can be set to "Shared" and have someone print them before you arrive.
 - Documents can be edited on the go and stored in the cloud again to print the latest version.

Business-to-business project Set and use multifunction device as shared output device among members.

- Before implementation**
- Different companies have no shared LAN environment so materials necessary for a meeting and updated documents cannot be printed immediately.
 - User management is troublesome, because there are various types of users including temporary workers and staff under outsourcing contracts.

- After implementation**
- Shared print environment can be created easily beyond the wall of different LAN environment of each company.
 - Secured output environment can be shared with appropriate access privilege setting.
 - If Office 365 is deployed, Azure Active Directory can be used as an ID management system. Centralized management of users and a printing environment is possible in an Internet environment. It is possible to significantly reduce managers' man-hours for user management.

At location without LAN environment

- Even without a LAN environment, printing environment can be created easily with just an Internet connection.
- As satellite offices and on-site offices increase, multifunction devices can be set as output device to print from your PC or mobile device.

Even photos taken with your mobile device

After a meeting for example, take a snapshot of the white board with your smartphone and upload it to the cloud server. Then easily print from a multifunction device configured as the output device.

Cloud On-Demand Print Functions & Specifications

Main Features

Item	Description
Number of Users that can be registered	10 to 30000 Users (Varies depending on your contract with us.)
Number of Guests that can be registered	10 to 20 Users (Varies depending on your contract with us.)
Number of files that can be registered	200 to 600000 (Varies depending on your contract with us.)
Authentication	User registration by administrator
Authentication method	User authentication using user ID and password
Uploaded document retention period	24 hours after being uploaded (by default) The retention period can be set in the following range: 1 hour, 2 hours, 3 hours, 6 hours, 12 hours, 1 day, 2 days, 3 days, 4 days, 5 days, 6 days and 7 days. The retention period can be changed for each Tenant.
Supported file format	Word files (doc, docx) XPS file (xps) ^{*3} Rich Text file (rtf) OpenXPS file (oxps) ^{*3} Excel files (xls,xlsx) JPEG files (jpg, jpeg, jpe) PowerPoint files (ppt, pptx) TIFF files (tif, tiff) DocuWorks files (xdw, xbd) ^{*1} PNG file (png) PDF file (pdf) ^{*2} Web page ^{*4}
Document file size	100 MB
Document paper size	A1 to B7
Number of registered multifunction devices	Up to 3000
Communication path encryption method	SSL (SSL 3.0 is not supported.)
Supported Cloud ID Management Service	Azure Active Directory
Supported Cloud Service	Box®, OneDrive for Business, SharePoint Online
Supported Languages ^{*5}	English, Traditional Chinese, Korean, Thai, Vietnamese, Japanese
File availability setting	Private / Shared

Note: Appearance on the PC or iOS / Android™ device and the printed result may be different.

*1: If the file contains special characters (non-standard characters and special characters), its appearance on the PC or iOS / Android™ device and the printed result may be different.

*2: If the font is not embedded in the file, its appearance on the PC or iOS / Android™ device and the printed result may be different.

*3: XPS stands for XML Paper Specification.

*4: Can be uploaded from an iOS / Android™ device.

*5: On a multifunction device, Cloud On-Demand Print screens are displayed in Japanese, English, Korean, Traditional Chinese, Thai or Vietnamese with the language switching function.

Web browser operating environment

Windows OS environment

Item	Description
Supported Operating System	Windows 10 (32bit / 64bit) Windows 8.1 Update (32bit / 64bit) Windows 7 (32bit / 64bit) [Service Pack 1]
Web Browser	Internet Explorer 11 Mozilla Firefox 62 or later version Microsoft Edge 42 or later version Google Chrome™ 68 or later version Mozilla Firefox ESR 60
Supported Languages ^{*1}	English, Traditional Chinese, Korean, Thai, Vietnamese, Japanese

*1: To be displayed in a language selected in [Language] at the bottom of Login screen. To be displayed in English if you select [Simplified Chinese]. Display language for Guest user follows the language setting at login.

Mac OS environment

Item	Description
Supported Operating System	macOS 10.14 Mojave OS X 10.11 El Capitan macOS 10.13 High Sierra OS X 10.10 Yosemite macOS 10.12 Sierra
Web Browser	Apple Safari 12 / 11 / 10 / 9 / 8 / 7.1 / 7.0
Supported Languages ^{*1}	English, Traditional Chinese, Korean, Thai, Vietnamese, Japanese

*1: To be displayed in a language selected in [Language] at the bottom of Login screen. To be displayed in English if you select [Simplified Chinese]. Display language for Guest user follows the language setting at login.

Linux® OS environment

Item	Description
Supported Operating System	Ubuntu® 18.04 LTS (64bit) CentOS 6.9 (32bit) CentOS 7.3 (64bit)
Web Browser	Mozilla Firefox ESR 60 Mozilla Firefox 62 or later version
Supported Languages ^{*1}	English, Traditional Chinese, Korean, Thai, Vietnamese, Japanese

*1: To be displayed in a language selected in [Language] at the bottom of Login screen. To be displayed in English if you select [Simplified Chinese]. Display language for Guest user follows the language setting at login.

Windows printer tool operating environment

Item	Description
Supported Operating System	Windows 10 (32bit / 64bit) Windows 8.1 Update (32bit / 64bit) Windows 7 (32bit / 64bit) [Service Pack 1]
CPU	Conforms to recommended value for each OS
Hard disk capacity	300 MB or more free space ^{*1}
Memory capacity	Conforms to recommended value for each OS
Display	Conforms to recommended value for each OS ^{*2}
Required software	Microsoft .NET Framework 4.7 Microsoft .NET Framework 4.6.2 / 4.6.1 / 4.6 Microsoft Outlook 2016 ^{*3} Microsoft Outlook 2013 ^{*3} Microsoft Outlook 2010 ^{*3} Windows Store Application "Mail" ^{*3} Gmail™ ^{*3} Mozilla Thunderbird ^{*3}
Supported Languages ^{*4}	English, Traditional Chinese, Korean, Thai, Vietnamese, Japanese

*1: If .NET Framework is not installed, additional free storage of 280 MB to 2 GB is necessary.

*2: Minimum resolution is XGA (1024 x 768 pixels).

*3: Required if sending file upload completion message by mail.

*4: If the operating system language is either of Japanese, English, Traditional Chinese, Korean, Thai or Vietnamese, Windows printer tool screens are displayed in the same language as the operating system. If the operating system language is other than the above, the printer tool screens are displayed in English.

Dedicated mobile applications

iOS environment

Item	Description
Supported Operating System	iOS 12 / 11
Supported Languages ^{*1}	English, Traditional Chinese, Korean, Thai, Vietnamese, Japanese

*1: If the operating system language is either of Japanese, English, Traditional Chinese, Korean, Thai or Vietnamese, mobile applications (iOS) screens are displayed in the same language as the operating system. If the operating system language is other than the above, the mobile applications screens are displayed in English.

Android™ environment

Item	Description
Supported Operating System	Android™ 9.0 / 8.0 / 7.1 / 7.0 / 6.0 / 5.1 / 5.0 / 4.4
Supported Languages ^{*1}	English, Traditional Chinese, Korean, Thai, Vietnamese, Japanese

Note: Applications are not tested on all models that satisfy the operating environment.

*1: If the operating system language is either of Japanese, English, Traditional Chinese, Korean, Thai or Vietnamese, mobile applications (Android™) screens are displayed in the same language as the operating system. If the operating system language is other than the above, the mobile applications screens are displayed in English.
