

# Prevent Data Breaches with Xerox® Print Security Audit Service

Protecting your organization from data breaches has never been more complex. Between evolving and more sophisticated attacks, employee mistakes and new technologies, there are a lot to consider. And even minor gaps in security measures can have major consequences.

While most organizations have policies and security measures in place to prevent employee mistakes, manage employee-owned devices and prevent hacking and cyberattacks, print infrastructure is one threat that consistently gets overlooked. It's time to do something about that.

## **XEROX® PRINT SECURITY AUDIT SERVICE CAN SAFEGUARD YOUR DEVICES, DOCUMENTS AND DATA.**

Xerox® Print Security Audit Service provides comprehensive security with a combination of industry-leading, easily configurable devices with built-in security features, Xerox® Device Manager and skilled professional service providers..

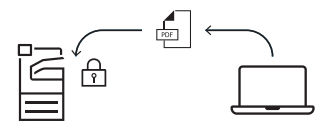

- Utilize built-in security features such as scan to USB enablement, job image overwrite, security patch/firmware management, certificate management and password management
- Intuitively manage print fleet configuration by setting print and security policies remotely for your entire fleet at once
- Automatically discover and configure devices based on established print policies and security settings
- Continuously and automatically inspect and monitor print policies across your fleet to maintain predictable network printer behavior
- Instantly remediate non-compliant devices at the fleet, device and even the device setting level
- Quickly receive notification of security events for faster resolution

### **BUSINESS SCENARIO:**

#### **The Challenge**

As part of the company's compliance requirement, Customer A is required to mitigate risk from potential data breaches and to safeguard their end-point devices such as printers. Although the potential breach might not be print-related, the lack of compliance exposes the Customer to critical risks with potential impact on revenue.

#### **The Solution**

Customer's security challenge is resolved with the Xerox® Print Security Audit Service which automatically maintains 100% compliance across devices.

Customer's data is protected throughout the document infrastructure with full compliance across critical areas such as Hard Disk Image Overwrite, USB Print/Scan Policy and Encryption. It also automates the processes to install security patches and device updates, thus reducing the vulnerability of the devices.

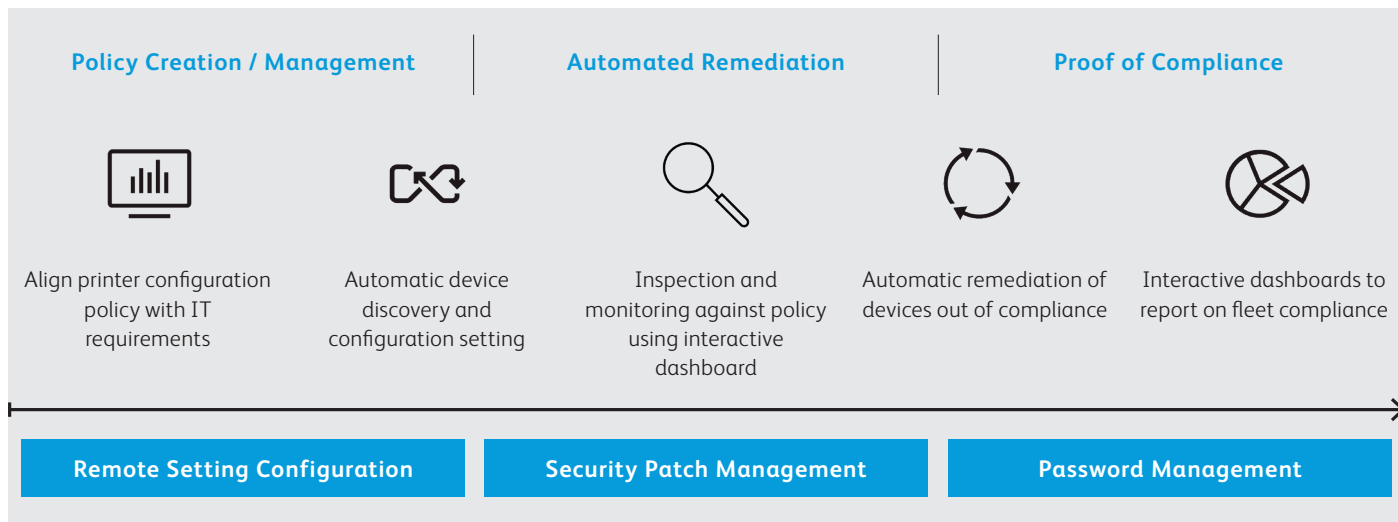

# Let's automate your approach to print fleet security.

Don't let your printers put your organization's most sensitive information at risk.

With our solution, you can effortlessly manage your fleet security and stop threats where they start.

## SECURE DEVICE MANAGEMENT

A policy-based compliance solution which automates print fleet security.

We help to protect your managed print services fleet from ongoing threats of security breaches through continuously monitoring and reporting activities that can be completed via scheduled time frames or invoked upon demand to meet your needs. Filters can be applied to the reports to highlight compliance and/or non-compliance and to selected devices or the entire fleet.

### WE CAN HELP IMPROVE THE WAY YOU WORK.

When it comes to protecting sensitive data, comprehensive security isn't just a good option. It's the only option. Let us put our experience in automation and our technology expertise to work for you. Closing gaps in your security measures. Strengthening safeguards. And keeping sensitive information safe.

With Fuji Xerox's layered security approach, we are continually seeking newer and innovative ways to secure our customer's print and document environment. So, you can do more.
